TORNEIO TEAM

Overview of Innovation Tournaments in torneio

- An *innovation tournament* is a systematic approach to drive innovation by applying the evolutionary principle of survival of the fittest. The goal of an innovation tournament is to improve the odds of eliciting great opportunities for further development by organizations in the pursuit of effective and innovative impact. It is a structured process which helps channel the knowledge, creativity, and inspiration of innovators who participate in the tournament.
- An innovation tournament acknowledges that the development of big innovations is more of a '*search*' process rather than an '*analysis*' process in its early stages.

- Participants in the tournament are called 'innovators'
- *torneio* is a web-based tool which enables the following key phases in the search:
  - *Submission*: innovators enter ideas for innovative opportunities
  - *Evaluation*: innovators give feedback on each others ideas in an anonymous way
  - *Reporting*: allows innovators to see the feedback on their ideas

- This document is a user manual for innovation tournament participants.
- An innovation tournament needs a facilitator. If you would like to learn about facilitation services for business model innovation or how to set up an innovation tournament to help spark innovation in your organization, email *contact@torneio.org*.

Idea Description

The description of each business opportunity should contain:

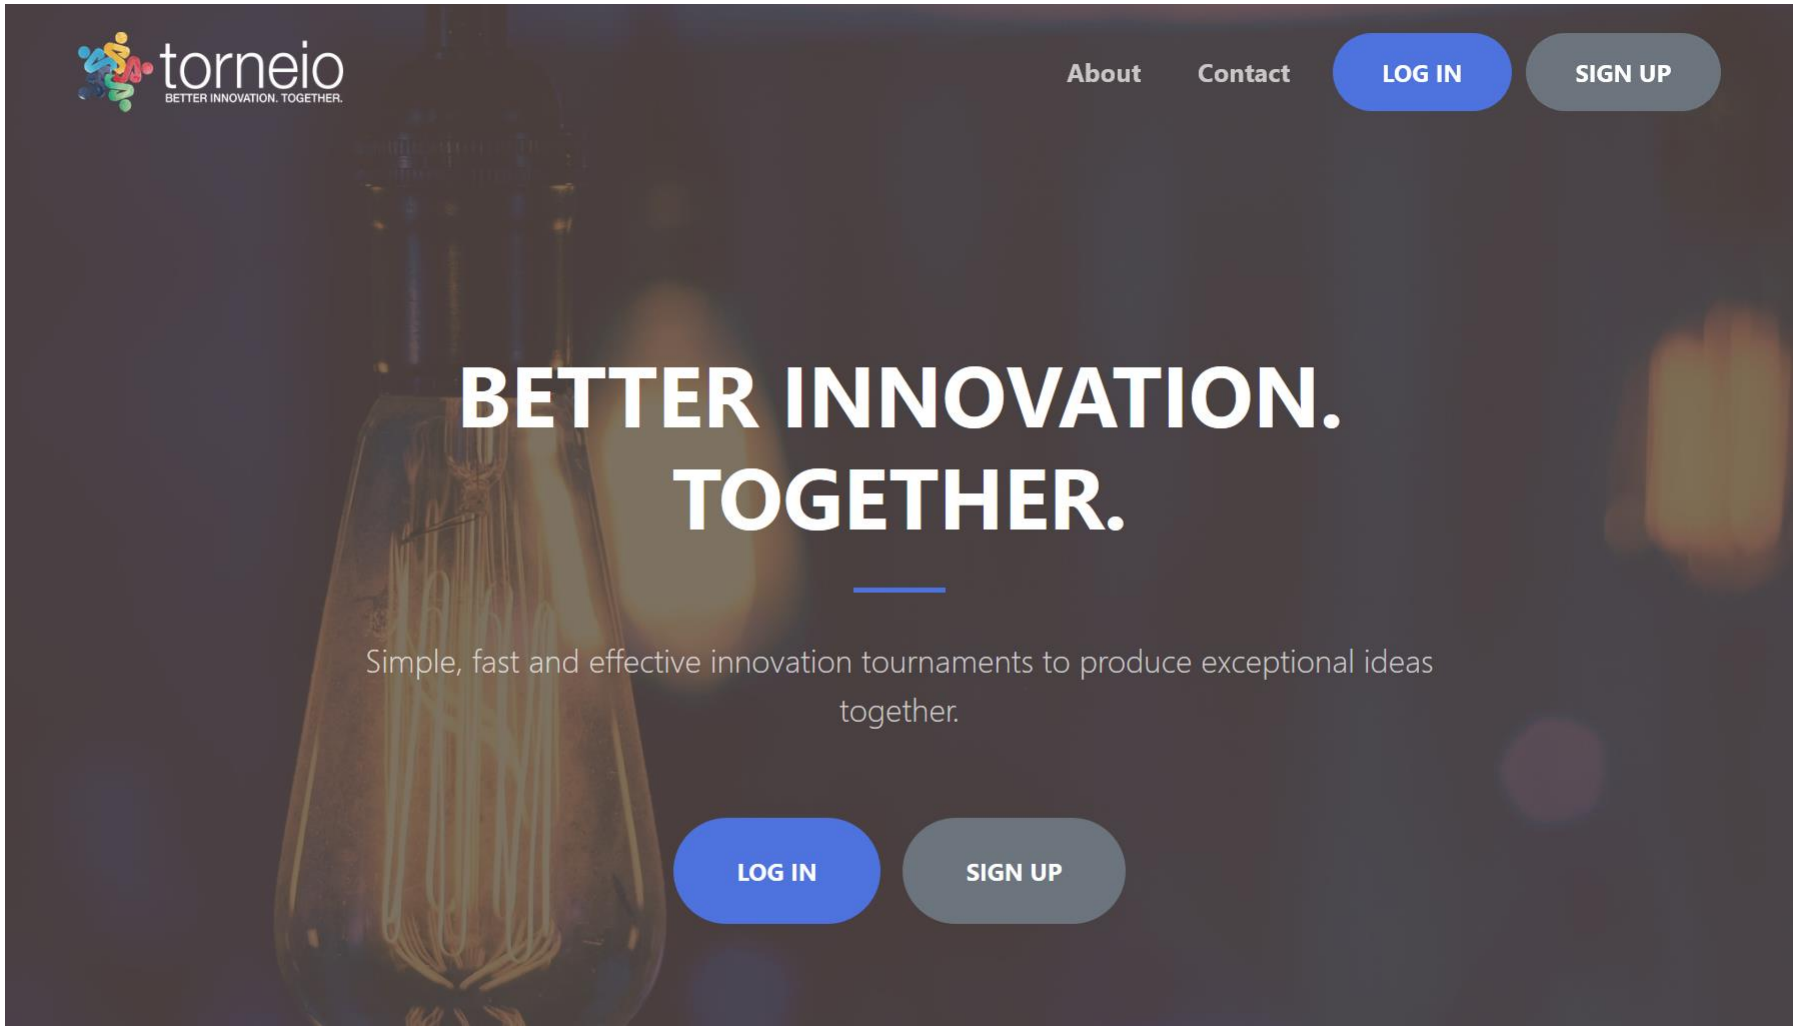

- **A title of the business opportunity.** Example: Stanplus: A medical transportation platform in India
- **A brief and to the point overview of the business.** Example: The business is "Uber for ambulances". Namely, a platform that aggregates and coordinates the ambulances of various medical transportation companies and hospitals in India.
- **A demand-side argument of why this business could be a good idea.** Example: There is no 911-type service in India. Medical transportation is provided by a disjoint set of providers, each with their own number and prices. As a result, ambulance wait-times in major Indian cities is measured in hours.
- **A supply-side argument of why the demand can be fulfilled by the business.** Example: The development of a platform app or call-center to match patients to ambulances is relatively simple and does not require major upfront investment.
- **Some hint of a "secret sauce", i.e., why you think this could be a great opportunity for your team and others have not pursued this before.** Example: Existing Indian medical transportation providers are too busy competing and managing their assets to coordinate dispatch. Hence, there is a market gap. Smartphones and 3G connectivity (essential for this business model) only recently became widespread in India. I have connections with a few Indian hospitals due to an internship that can help launch this business. Technology development will be easy because we are at Georgia Tech.
- **What tools from class this idea leverages.** Example: Stanplus uses pooling, focus, resequencing, etc.

The example above is adapted from a previous iteration of the course. The proposed business model went on to become a real business. More at https://www.stanplus.com/.

When ideating, do not self-censure. You do not care about the quality of your average idea - only of your best idea. Hence, variance is important.

TORNEIO – EVALUATE IDEAS

- Log in to the torneio system with the torneio instructions
- Select the tournament for the class
- Evaluate at least 15x the number you entered (e.g. evaluate 90+ if you entered 6 ideas)

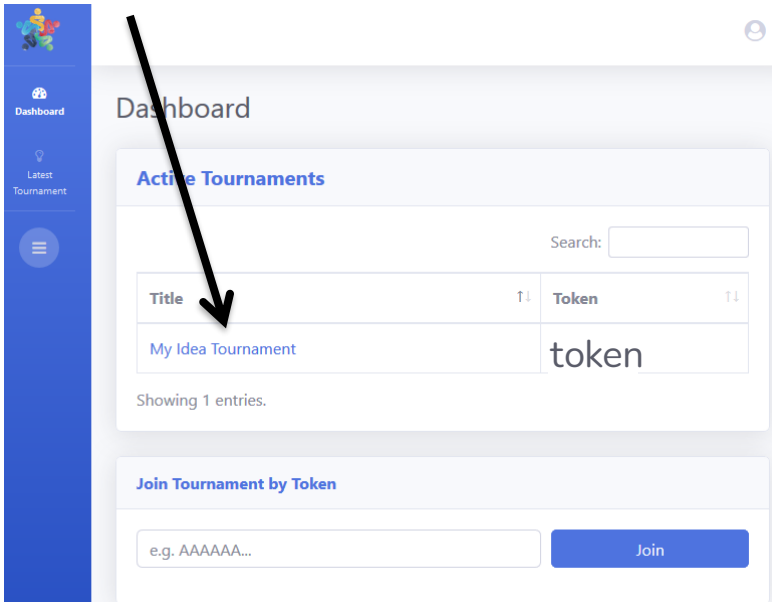

© 2020, TORNEIO TEAM

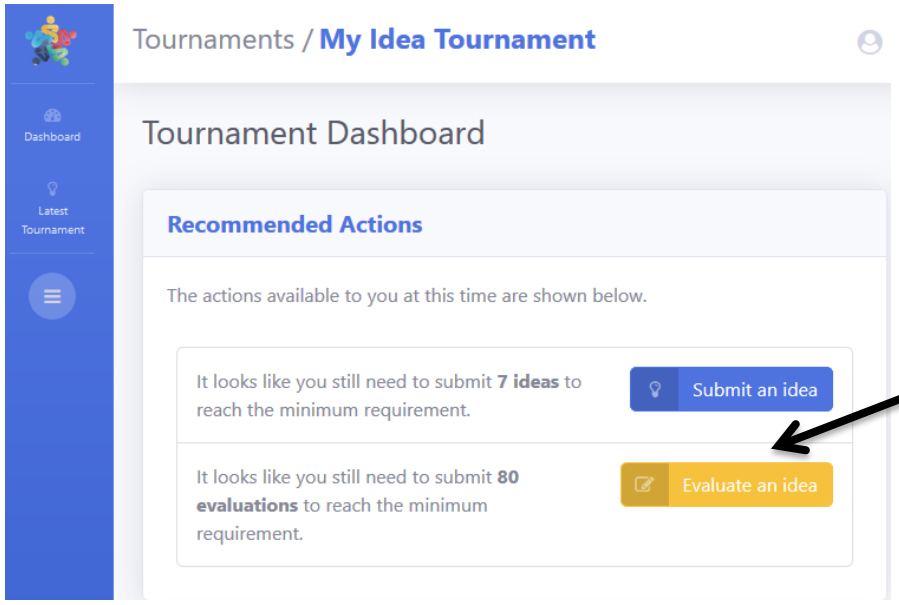

LOG IN TO TORNEIO AND ENTER EVALUATION MODE

Step 1: Go to https://www.torneio.org/ and login with your account

Step 2: Select a tournament to view its dashboard and options for interacting.

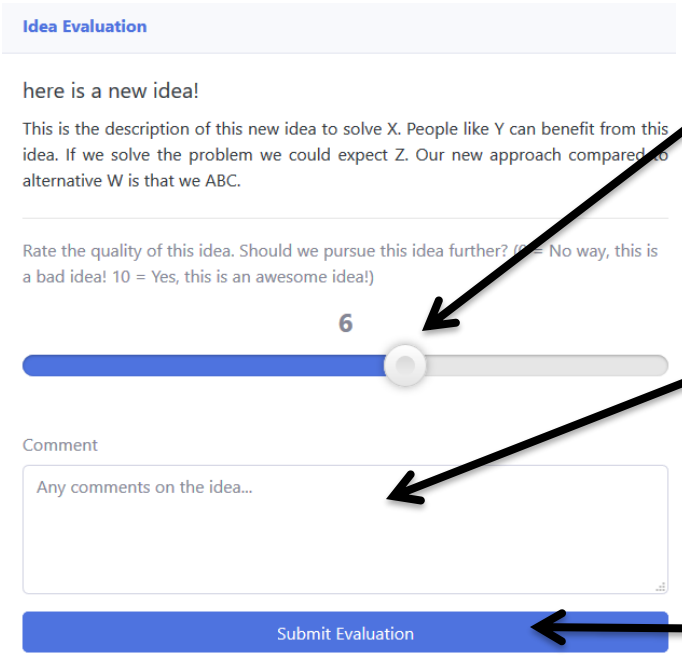

Step 3: click the 'evaluate an idea' button to enter evaluation mode.

EVALUATION OF AN IDEA

Step 4: After entering evaluation mode, scroll the slider to score the idea, with 0 being low priority and 10 being great/high priority

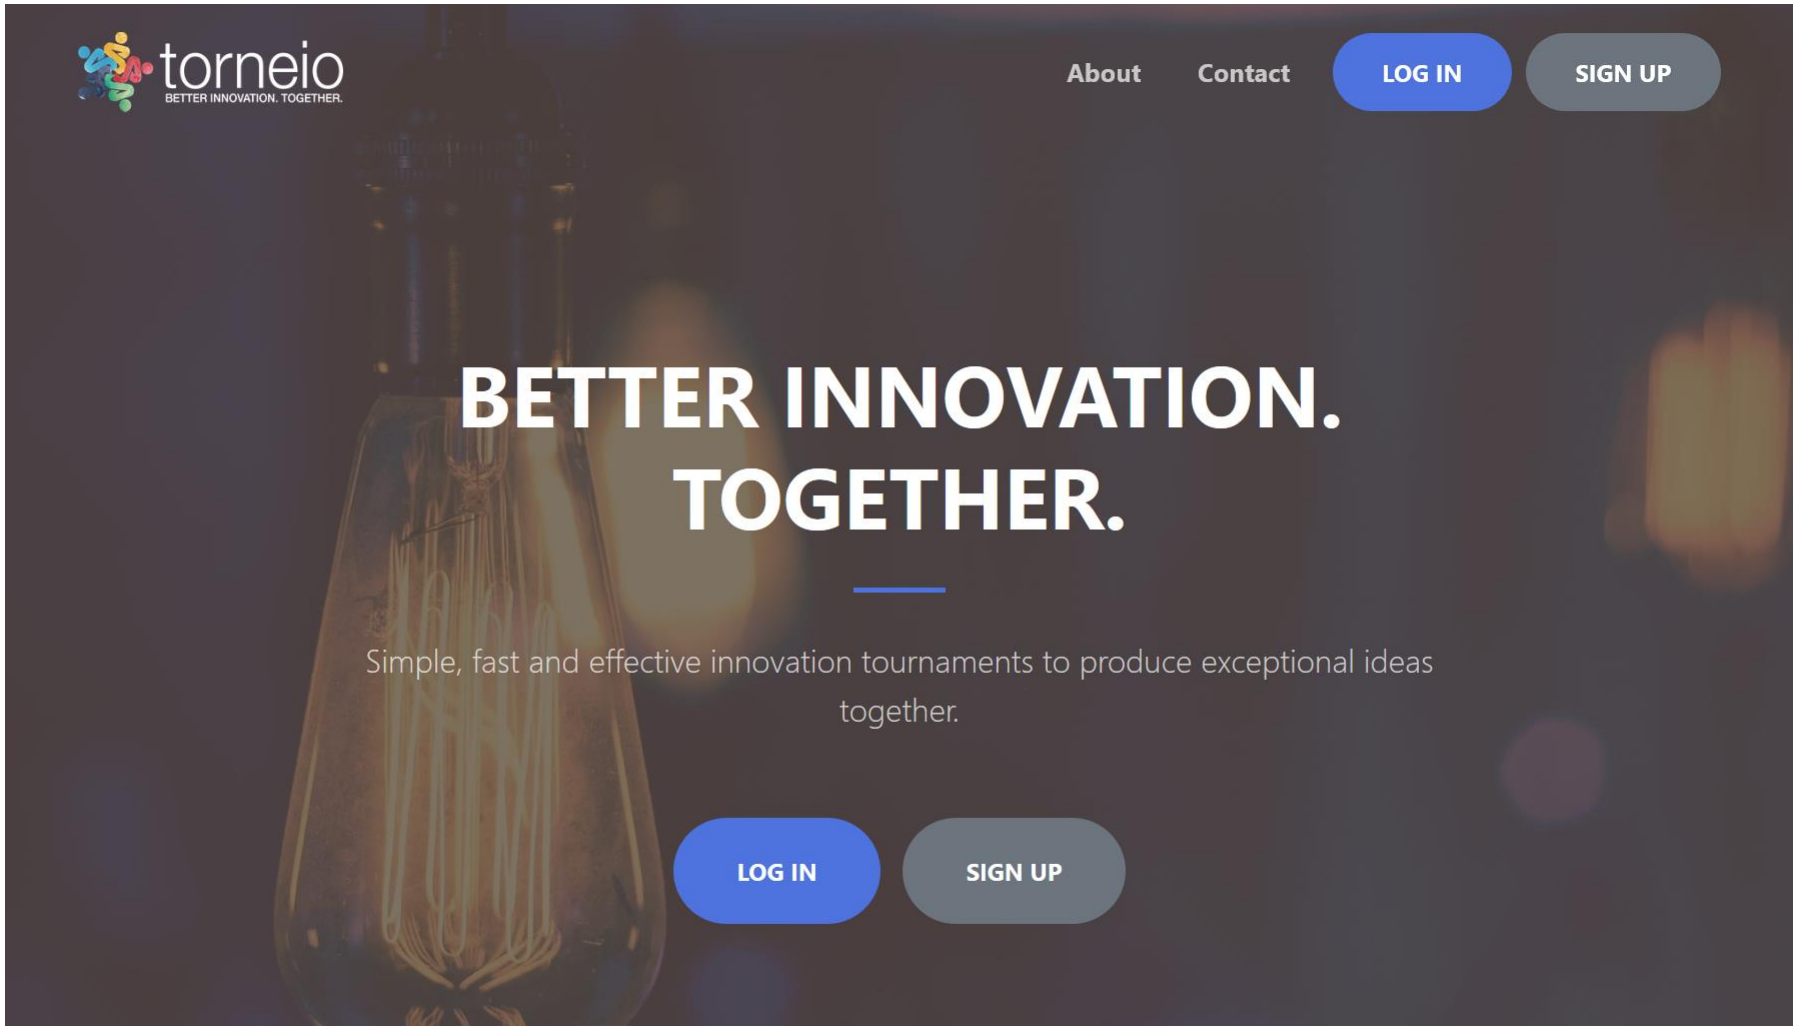

Step 5 (optional): Enter a short constructive, informative feedback (optional)

Step 6: Click submit to confirm the evaluation to torneio.

NOTE: If evaluation mode get's stuck on an idea and you can't move ahead, click on the torneio logo, then go back into the tournament and continue to evaluate. That usually fixes the issue.
